

ALEXANDER USTRA

Web Developer with solid knowledge of various web technologies. I have been developing web applications for 2 years, working on personal projects that showcase my ability to create clean, efficient, and user-friendly designs.

I consider myself a perfectionist and adaptable, driven by a constant desire to overcome challenges and achieve excellence in everything I do. I enjoy learning and continuously improving, and I have a strong willingness to work in a team and communicate effectively.

Education

2023
Tacuarembó
Uruguay

Marketing Technician
Polo Educativo Tecnológico
Tacuarembó

Supplementary Education

2023- 2024
Tacuarembó
Uruguay

Web Developer
Jovenes a Programar

Experience

Since I started, I've been consistently practicing and developing my skills through personal projects. Among them is a group eCommerce project where I collaborated on the user interface design and integrated APIs to enhance the user experience. I also created a restaurant-like website with features such as reservations, delivery, and order tracking.

Another project is an interactive map that divides Montevideo into zones based on danger levels, using official government data. Additionally, I developed a time management page that includes real-time tracking of daily and weekly activities, a customizable timer, and the creation of automated routines.

Skills and Knowledge

- React, Bootstrap, TypeScript, Node.js, JavaScript, UX Design, HTML5 y CSS3, Github, Storybook and Figma.
- Knowledge in Marketing
- **Spanish – Native proficiency**
